

## **HYPERSUITE MR/3, out of the box solution for legal e-mail archiving**

The vast amounts of information generated by corporate e-mail communications requires secure archival. Yet the requirements of day to day business demands that these communications can be easily located and retrieved for further business use. IMTF's MR/3 solves this problem. MR/3 is an out of the box solution for legal archiving of e-mails, capable of seamless integration into the most common e-mailing systems such as Exchange and Lotus Notes. MR/3 complies with the effective international and the stringent demands of Swiss legal regulations (GeBüV, EIDI-V, etc.) for archiving business-relevant documents according to corporate and legal specifications.

## HYPERSUITE MR/3

### Key Functions:

- Digital encryption and signature
- Full text search in e-mail body and annexes
- Incoming and outgoing e-mails are archived prior to receipt
- Storage of e-mails and annexes in a single document
- Intelligent management of authorization for data access, data search and joint use of data
- E-Mail Lifecycle Management

### Your Benefits:

- Guaranteed confidentiality and protection against fraudulent use
- Superior search functionality and increased productivity thanks to fast and permanent access to archived e-mails
- Protection against manipulation
- Reduced exchange server loading and control over required storage space. No full mailboxes
- Increased efficiency and reduced involvement of staff
- Complies with the effective international and Swiss legal regulations such as GeBüV and EIDI-V
- Out of the box solution but also modularly available
- Seamless integration into the most common e-mailing systems such as Exchange and Lotus Notes
